

Script component inside Head component

Why This Error Occurred The `next/script` component shouldn't be placed inside the `next/head` component

Possible Ways to Fix It Move the `<Script />` component outside of `<Head>...</Head>`

Before

```
import Script from 'next/script'
import Head from 'next/head'

export default function Index() {
  return (
    <Head>
      <title>Next.js</title>
      <Script src="/my-script.js" />
    </Head>
  )
}
```

After

```
import Script from 'next/script'
import Head from 'next/head'

export default function Index() {
  return (
    <>
      <Head>
        <title>Next.js</title>
      </Head>
      <Script src="/my-script.js" />
    </>
  )
}
```
