

**Note: this error code is no longer emitted by the compiler.** The `pub` keyword was used inside a public enum.

Erroneous code example:

```
pub enum Foo {  
    pub Bar, // error: unnecessary `pub` visibility  
}
```

Since the enum is already public, adding `pub` on one its elements is unnecessary.

Example:

```
enum Foo {  
    pub Bar, // not ok!  
}
```

This is the correct syntax:

```
pub enum Foo {  
    Bar, // ok!  
}
```
