

## EventEmitter.off() method

Remove an event listener from firing.

**Signature:**

```
off(event: EventType, handler: Handler): EventEmitter;
```

### Parameters

Parameter	Type	Description
event	<a href="#">EventType</a>	the event type you'd like to stop listening to.
handler	<a href="#">Handler</a>	the function that should be removed.

**Returns:**

[EventEmitter](#)

`this` to enable you to chain method calls.
