

# API Routes Response Size Limited to 4MB

## Why This Error Occurred

API Routes are meant to respond quickly and are not intended to support responding with large amounts of data. The maximum size of responses is 4 MB.

## Possible Ways to Fix It

Limit your API Route responses to less than 4 MB. If you need to support sending large files to the client, you should consider using a dedicated media host for those assets. See link below for suggestions.
