

QA Notes – checking & polishing Fira Code for Google Fonts

- ☒ autohint static TTFs
- ☐ check extrapolated outlines for issues

Checks to resolve

=====

Waiting on others

- ▶  **FAIL:** Copyright notices match canonical pattern in fonts
 - additionally, it's unclear how the original copyright on Fira Mono & Fira Code should best be integrated to credit all designers involved
 - ☒ file issue on fontbakery (<https://github.com/googlefonts/fontbakery/issues/2419>)
 - ☒ confirm that current approach is fine (<https://github.com/google/fonts/issues/1460#issuecomment-476713822>) (seems okay, based on Hangouts discussion)

▶ [119] FiraCode-Light.ttf
