

With Three js

This example uses:

[three.js](#) : A lightweight, 3D library with a default WebGL renderer. The library also provides Canvas 2D, SVG and CSS3D renderers in the examples. [react-three-fiber](#) : A React renderer for Threejs on the web and react-native. [drei](#) : A growing collection of useful helpers and abstractions for react-three-fiber.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-three-js with-three-js-app
# or
yarn create next-app --example with-three-js with-three-js-app
# or
pnpm create next-app -- --example with-three-js with-three-js-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
