

character-entities-legacy

build **passing** downloads **32M/month** minzipped size **522 B**

HTML legacy character entity information: for legacy reasons some character entities are not required to have a trailing semicolon: `©` is perfectly okay for `©`.

Install

[npm](#):

```
npm install character-entities-legacy
```

Use

```
var characterEntitiesLegacy = require('character-entities-legacy')

console.log(characterEntitiesLegacy.copy) // => '©'
console.log(characterEntitiesLegacy.frac34) // => '¾'
console.log(characterEntitiesLegacy.sup1) // => '¹'
```

API

`characterEntitiesLegacy`

Mapping between (case-sensitive) legacy character entity names to replacements.

Support

See [whatwg/html](#).
