

# mobile-status-bar

[Source code of released version](#) | [Source code of development version](#)

---

This package allows you to customize the status bar on Meteor Phonegap/Cordova apps.

Right now it just exposes the standard `cordova-plugin-statusbar` plugin for Phonegap/Cordova with some defaults. For the extensive documentation see the original [plugin repo](#).

You can set status bar preferences in your `mobile-config.js` [file](#) like this:

```
App.setPreference('StatusBarOverlaysWebView', 'false');
App.setPreference('StatusBarBackgroundColor', '#000000');
```
