Manage Grafana library panels

You can adjust library panel configuration at any time.

Before you begin

- [Add a panel to a dashboard]({{< relref "../working-with-panels/add-panel.md" >}}).

To view and manage a library panel:

1. Hover over the **Dashboard** option on the left menu, then click **Library panels**.

You can see a list of previously defined library panels. {{< figure src="/static/img/docs/library-panels/library-panel-list-8-0.png" class="docs-image--no-shadow" max-width= "900px" caption="Screenshot of the edit panel" >}}

2. Search for a specific library panel if you know its name.

You can also filter the panels by folder or type.
