

sbt plugin

This plugin adds completion for the sbt, the interactive build tool, as well as some aliases for common sbt commands.

To use it, add `sbt` to the plugins array in your `zshrc` file:

```
plugins=(... sbt)
```

Aliases

Alias	Command	Description
sbc	<code>sbt compile</code>	Compiles the main sources
sbcn	<code>sbt clean</code>	Deletes all generated files
sbcc	<code>sbt clean</code> <code>compile</code>	Deletes generated files, compiles the main sources
