

React Remove Properties Example

This example shows how to use the `reactRemoveProperties` config option to remove React properties.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example react-remove-properties react-remove-properties-app
# or
yarn create next-app --example react-remove-properties react-remove-properties-app
# or
pnpm create next-app -- --example react-remove-properties react-remove-properties-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
