

Here are the most significant improvements in December:

- 📢 We have introduced a new [Alert](#) component in the lab, thanks to [@dimitropoulos \(#18702\)](#). The component also supports composition with a [Snackbar](#).

Standard variant

Filled variant

- 👤 We have added [stacking](#) support to the avatar.

- ⬆️ We have added [vertical](#) support to the button group.

- 🌐 We have almost doubled the number of supported [locales](#) from 13 to 22, thanks to our awesome contributors. [Help us](#) double this number next month 🚀!

But this summary is just scratching the surface. We have accepted 168 commits from 73 different contributors. We have changed 1,059 files with 13,468 additions and 8,584 deletions.

Our roadmap intent for January

(We'll do our best, no guarantee!)

- 📢 We will keep working on a new [pagination](#) component. You can already [preview it](#) (lead by [@mbrookes](#)).

- 📅 We will keep working on a major upgrade of the [date/time picker](#) components. We are working on desktop and range support (lead by [@dmtrKovalenko](#)).

- 📊 We will keep working on a new [data grid](#) component. You can already [preview it](#) (lead by [@oliviertassinari](#)).

❓ Please upvote our [GitHub issues](#) if you want something specific. The number of 👍 helps us to prioritize.
