

To add a new server side rendering E2E test

- Add a new server side rendered application to `src/`
- Edit `webpack.client.config.js` to add new entry point for the new client bundle
- The `index.html` can access the client bundle from `/built/.js`
- Edit `src/server.ts` to add the server side application to a new URL
- Add a protractor test in `e2e/` to test with the new URL
