

# Gatsby E-Commerce Starter

This is a Gatsby e-commerce example based on <https://www.gatsbyjs.com/tutorial/ecommerce-tutorial/>

## Setup

- First, you must enable client-only Checkout in your Stripe Dashboard: <https://dashboard.stripe.com/account/checkout/settings>
- Next, create a product and price from the Stripe Dashboard: <https://dashboard.stripe.com/test/products>

## Run locally

- `git clone https://github.com/thorsten-stripe/ecommerce-gatsby-tutorial.git`
- Make a copy of the example .env file: `cp .env.example .env.development`
- Add your Stripe API keys to the newly created `.env.development` file.
- `run npm install`
- `run gatsby develop`

 **Build, Preview, and Deploy to Gatsby Cloud**
