

service-configuration

[Source code of released version](#) | [Source code of development version](#)

Configure login services. Example:

```
ServiceConfiguration.configurations.upsert(  
  { service: "weibo" },  
  { $set: { clientId: "1292962797", secret: "75a730b58f5691de5522789070c319bc" } }  
);
```
