

## zh-CN

响应式配置列的展示。

## en-US

Responsive columns.

```
import { Table } from 'antd';

const columns = [
  {
    title: 'Name (all screens)',
    dataIndex: 'name',
    key: 'name',
    render: text => <a>{text}</a>,
  },
  {
    title: 'Age (medium screen or bigger)',
    dataIndex: 'age',
    key: 'age',
    responsive: ['md'],
  },
  {
    title: 'Address (large screen or bigger)',
    dataIndex: 'address',
    key: 'address',
    responsive: ['lg'],
  },
];

const data = [
  {
    key: '1',
    name: 'John Brown',
    age: 32,
    address: 'New York No. 1 Lake Park',
  },
];

export default () => <Table columns={columns} dataSource={data} />;
```
