

This is a simple example that shows the usage of WebAssembly.

WebAssembly modules can be imported like other async modules with `import` or `import()`. When importing, they are downloaded and instantiated in a streaming way.

example.js

```
_{{example.js}}_
```

math.js

```
_{{math.js}}_
```

dist/output.js

```
_{{dist/output.js}}_
```

Info

Unoptimized

```
_{{stdout}}_
```

Production mode

```
_{{production:stdout}}_
```
