A list of plugins that don't come bundled with Oh My Zsh

There is no restriction for adding your plugin into zsh bundle (unlike themes) but the rationale for creating this page is next:

- sometimes you're not really sure if your plugin will not harm (e.g. it can break something).

Installation

It should be clear from this.

The plugins

Custom git plugin Fixes some inconsistencies in the default git plugin that make the aliases more intuitive, while adding some other useful functions.

You can get it from [here](#).

Git auto status If you found yourself constantly typing `git status` after bunch of commands like `git commit` and you want to avoid that, then this plugin is for you.

This plugin is a nice addition to `git_prompt_status`.

You can get it from [here](#).

History Sync GPG encrypted, Internet synchronized Zsh history using Git.

You can get it from [here](#).

Doge Say Get a doge to repeat every command you put in!

See it in action:

And get your doge [here](#).

fz Give tab-completions to `z`.
