External Group Synchronization API

External Group Synchronization is only available in Grafana Enterprise. Read more about [Grafana Enterprise]({{< relref "../enterprise" >}}).

If you have [Fine-grained access control]({{< relref "../enterprise/access-control/_index.md" >}}) enabled, access to endpoints will be controlled by Fine-grained access control permissions. Refer to specific endpoints to understand what permissions are required.

Get External Groups

GET /api/teams/:teamId/groups

Required permissions

See note in the [introduction]({{< ref "#team-api" >}}) for an explanation.

Action	Scope
teams.permissions:read	teams:*

Example Request:

```
GET /api/teams/1/groups HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Basic YWRtaW46YWRtaW4=
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

[
  {
    "orgId": 1,
    "teamId": 1,
    "groupId": "cn=editors,ou=groups,dc=grafana,dc=org"
  }
]
```

Status Codes:

- **200** - Ok
- **401** - Unauthorized
- **403** - Permission denied

Add External Group

POST /api/teams/:teamId/groups

Required permissions

See note in the [introduction]({{< ref "#team-api" >}}) for an explanation.

Action	Scope
teams.permissions:write	teams:*

Example Request:

```
POST /api/teams/1/members HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Basic YWRtaW46YWRtaW4=

{
  "groupId": "cn=editors,ou=groups,dc=grafana,dc=org"
}
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

{"message":"Group added to Team"}
```

Status Codes:

- **200** - Ok
- **400** - Group is already added to this team
- **401** - Unauthorized
- **403** - Permission denied
- **404** - Team not found

Remove External Group

DELETE /api/teams/:teamId/groups/:groupId

Required permissions

See note in the [introduction]({{< ref "#team-api" >}}) for an explanation.

Action	Scope
teams.permissions:write	teams:*

Example Request:

```
DELETE /api/teams/1/groups/cn=editors,ou=groups,dc=grafana,dc=org HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Basic YWRtaW46YWRtaW4=
```

Example Response:

```
HTTP/1.1 200
Content-Type: application/json

{"message":"Team Group removed"}
```

Status Codes:

- **200** - Ok
- **401** - Unauthorized
- **403** - Permission denied
- **404** - Team not found/Group not found
