

# Breadcrumb

Displays the location of the current page, making it easier to browser back.

## Basic usage

demo In `el-breadcrumb`, each `el-breadcrumb-item` is a tag that stands for every level starting from homepage. This component has a `String` attribute `separator`, and it determines the separator. Its default value is `'/'`.

```
<el-breadcrumb separator="/">
  <el-breadcrumb-item :to="{ path: '/' }">homepage</el-breadcrumb-item>
  <el-breadcrumb-item><a href="/">promotion management</a></el-breadcrumb-item>
  <el-breadcrumb-item>promotion list</el-breadcrumb-item>
  <el-breadcrumb-item>promotion detail</el-breadcrumb-item>
</el-breadcrumb>
```

...

## Icon separator

demo Set `separator-class` to use `iconfont` as the separator, it will cover `separator`

```
<el-breadcrumb separator-class="el-icon-arrow-right">
  <el-breadcrumb-item :to="{ path: '/' }">homepage</el-breadcrumb-item>
  <el-breadcrumb-item>promotion management</el-breadcrumb-item>
  <el-breadcrumb-item>promotion list</el-breadcrumb-item>
  <el-breadcrumb-item>promotion detail</el-breadcrumb-item>
</el-breadcrumb>
```

...
