

Home > puppeteer > Page > addScriptTag

Page.addScriptTag() method

Adds a `<script>` tag into the page with the desired URL or content.

Signature:

```
addScriptTag(options: {  
    url?: string;  
    path?: string;  
    content?: string;  
    type?: string;  
}): Promise<ElementHandle>;
```

Parameters

Parameter	Type	Description
options	{ url?: string; path?: string; content?: string; type?: string; }	

Returns:

Promise<ElementHandle>

Promise which resolves to the added tag when the script's onload fires or when the script content was injected into frame.

Remarks

Shortcut for `page.mainFrame().addScriptTag(options)`.
