

# character-entities

build **passing** downloads **34M/month** minzipped size **11.4 kB**

HTML character entity information.

## Install

[npm](#):

```
npm install character-entities
```

## Use

```
var characterEntities = require('character-entities')

console.log(characterEntities.AElig) // => 'Æ'
console.log(characterEntities.aelig) // => 'æ'
console.log(characterEntities.amp)  // => '&'
```

## API

### characterEntities

Mapping between (case-sensitive) character entity names to replacements.

## Support

See <http://html.spec.whatwg.org>.
