

rsync

This plugin adds aliases for frequent [rsync](#) commands.

To use it add `rsync` to the plugins array in you zshrc file.

```
plugins=(... rsync)
```

Alias	Command
<i>rsync-copy</i>	<code>rsync -avz --progress -h</code>
<i>rsync-move</i>	<code>rsync -avz --progress -h --remove-source-files</code>
<i>rsync-update</i>	<code>rsync -avzu --progress -h</code>
<i>rsync-synchronize</i>	<code>rsync -avzu --delete --progress -h</code>
