

Concrete Objects Layer

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\ (cpython-main) (Doc) (c-api) concrete.rst, line 1)

Unknown directive type "highlight".

```
.. highlight:: c
```

The functions in this chapter are specific to certain Python object types. Passing them an object of the wrong type is not a good idea; if you receive an object from a Python program and you are not sure that it has the right type, you must perform a type check first; for example, to check that an object is a dictionary, use `c:func:'PyDict_Check'`. The chapter is structured like the "family tree" of Python object types.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\ (cpython-main) (Doc) (c-api) concrete.rst, line 10); [backlink](#)

Unknown interpreted text role "c:func".

Warning

While the functions described in this chapter carefully check the type of the objects which are passed in, many of them do not check for `NULL` being passed instead of a valid object. Allowing `NULL` to be passed in can cause memory access violations and immediate termination of the interpreter.

Fundamental Objects

This section describes Python type objects and the singleton object `None`.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\ (cpython-main) (Doc) (c-api) concrete.rst, line 32)

Unknown directive type "toctree".

```
.. toctree::  
  
    type.rst  
    none.rst
```

Numeric Objects

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\ (cpython-main) (Doc) (c-api) concrete.rst, line 43)

Unknown directive type "index".

```
.. index:: object: numeric
```

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\ (cpython-main) (Doc) (c-api) concrete.rst, line 45)

Unknown directive type "toctree".

```
.. toctree::  
  
    long.rst  
    bool.rst  
    float.rst  
    complex.rst
```

Sequence Objects

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 58)

Unknown directive type "index".

```
.. index:: object: sequence
```

Generic operations on sequence objects were discussed in the previous chapter; this section deals with the specific kinds of sequence objects that are intrinsic to the Python language.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 66)

Unknown directive type "toctree".

```
.. toctree::

    bytes.rst
    bytearray.rst
    unicode.rst
    tuple.rst
    list.rst
```

Container Objects

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 80)

Unknown directive type "index".

```
.. index:: object: mapping
```

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 82)

Unknown directive type "toctree".

```
.. toctree::

    dict.rst
    set.rst
```

Function Objects

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 93)

Unknown directive type "toctree".

```
.. toctree::

    function.rst
    method.rst
    cell.rst
    code.rst
```

Other Objects

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\c-api\cpython-main) (Doc) (c-api) concrete.rst, line 104)

Unknown directive type "toctree".

```
.. toctree::  
  
    file.rst  
    module.rst  
    iterator.rst  
    descriptor.rst  
    slice.rst
