

This example shows the usage of the asset module type with asset generator options customization.

Files can be imported similar to other modules without file-loader or url-loader.

example.js

```
_{{example.js}}_
```

webpack.config.js

```
_{{webpack.config.js}}_
```

js/output.js

```
_{{dist/output.js}}_
```

Info

webpack output

```
_{{stdout}}_
```
