

Examples

This folder contains actively maintained examples of use of 🤗 Transformers using the PyTorch backend, organized along NLP tasks.

The Big Table of Tasks

Here is the list of all our examples:

- with information on whether they are **built on top of `Trainer`** (if not, they still work, they might just lack some features),
- whether or not they have a version using the 🤗 [Accelerate](#) library.
- whether or not they leverage the 🤗 [Datasets](#) library.
- links to **Colab notebooks** to walk through the scripts and run them easily,
