

zh-CN

可以同时展开多个面板，这个例子默认展开了第一个。

en-US

More than one panel can be expanded at a time, the first panel is initialized to be active in this case.

```
import { Collapse, Select } from 'antd';
import { SettingOutlined } from '@ant-design/icons';

const { Panel } = Collapse;
const { Option } = Select;

function callback(key) {
  console.log(key);
}

const text = `
  A dog is a type of domesticated animal.
  Known for its loyalty and faithfulness,
  it can be found as a welcome guest in many households across the world.
`;

const genExtra = () => (
  <SettingOutlined
    onClick={event => {
      // If you don't want click extra trigger collapse, you can prevent this:
      event.stopPropagation();
    }}
  />
);

class Demo extends React.Component {
  state = {
    expandIconPosition: 'left',
  };

  onPositionChange = expandIconPosition => {
    this.setState({ expandIconPosition });
  };

  render() {
    const { expandIconPosition } = this.state;
    return (
      <>
        <Collapse
          defaultActiveKey={['1']}
          onChange={callback}
          expandIconPosition={expandIconPosition}
        >
```

```

    <Panel header="This is panel header 1" key="1" extra={genExtra()}>
      <div>{text}</div>
    </Panel>
    <Panel header="This is panel header 2" key="2" extra={genExtra()}>
      <div>{text}</div>
    </Panel>
    <Panel header="This is panel header 3" key="3" extra={genExtra()}>
      <div>{text}</div>
    </Panel>
  </Collapse>
  <br />
  <span>Expand Icon Position: </span>
  <Select
    value={expandIconPosition}
    style={{ margin: '0 8px' }}
    onChange={this.onPositionChange}
  >
    <Option value="left">left</Option>
    <Option value="right">right</Option>
  </Select>
</>
  );
}
}

export default () => <Demo />;

```
