

svn-fast-info plugin

Faster alternative to the main SVN plugin implementation. Works with svn 1.6 and newer. Use as a drop-in replacement to the svn plugin, not as complementary.

To use it, add `svn-fast-info` to the plugins array in your zshrc file:

```
plugins=(... svn-fast-info)
```

It's faster because it has an efficient use of svn (single svn call) which saves a lot on a huge codebase. It displays the current status of the local files (added, deleted, modified, replaced, or else...)

Use `svn_prompt_info` method to display the svn repository status in your theme.

Functions

- `svn_prompt_info` : displays all the available information regarding the status of the svn repository.
- `svn_repo_need_upgrade` : shows whether the repository needs upgrading. `svn_prompt_info` queries the rest of functions or not based on the result of this function.
- `svn_current_branch_name` : shows the current branch.
- `svn_repo_root_name` : displays the repository root.
- `svn_current_revision` : shows the currently checked-out revision.
- `svn_status_info` : shows a bunch of symbols depending on the status of the files in the repository.

Options

- `ZSH_THEME_SVN_PROMPT_PREFIX` : sequence displayed at the beginning of the prompt info output.
- `ZSH_THEME_SVN_PROMPT_SUFFIX` : sequence displayed at the end of the prompt info output.
- `ZSH_THEME_SVN_PROMPT_CLEAN` : sequence displayed when the status of the repository is clean.
Default: `+` .
- `ZSH_THEME_SVN_PROMPT_DELETIONS` : sequence displayed if there are deleted files in the repository.
Default: `×` .
- `ZSH_THEME_SVN_PROMPT_MODIFICATIONS` : sequence displayed if there are modified files in the repository. **Default:** `↗` .
- `ZSH_THEME_SVN_PROMPT_REPLACEMENTS` : sequence displayed if there are replaced files in the repository. **Default:** `~` .
- `ZSH_THEME_SVN_PROMPT_UNTRACKED` : sequence displayed if there are untracked files in the repository.
Default: `?` .
- `ZSH_THEME_SVN_PROMPT_DIRTY` : sequence displayed if the repository is dirty. **Default:** `!` .
