

Private modules cannot be publicly re-exported. This error indicates that you attempted to `pub use` a module that was not itself public.

Erroneous code example:

```
mod foo {  
    pub const X: u32 = 1;  
}  
  
pub use foo as foo2;  
  
fn main() {}
```

The solution to this problem is to ensure that the module that you are re-exporting is itself marked with `pub` :

```
pub mod foo {  
    pub const X: u32 = 1;  
}  
  
pub use foo as foo2;  
  
fn main() {}
```

See the [Use Declarations](#) section of the reference for more information on this topic.
