

This is a very simple example that shows the usage of the asset module type.

Files can be imported like other modules without file-loader.

## **example.js**

```
_{{example.js}}_
```

## **webpack.config.js**

```
_{{webpack.config.js}}_
```

## **js/output.js**

```
_{{dist/output.js}}_
```

## **Info**

### **webpack output**

```
_{{stdout}}_
```
