

ioctl DMX_QUERYBUF

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 2)

Unknown directive type "c:namespace".

```
.. c:namespace:: DTV.dmx
```

Name

DMX_QUERYBUF - Query the status of a buffer

Warning

this API is still experimental

Synopsis

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 20)

Unknown directive type "c:macro".

```
.. c:macro:: DMX_QUERYBUF
```

```
int ioctl(int fd, DMX_QUERYBUF, struct dvb_buffer *argp)
```

Arguments

fd

File descriptor returned by `c:func:open()`.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 28); [backlink](#)

Unknown interpreted text role "c:func".

argp

Pointer to struct `c:type:dvb_buffer`.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 31); [backlink](#)

Unknown interpreted text role "c:type".

Description

This ioctl is part of the mmap streaming I/O method. It can be used to query the status of a buffer at any time after buffers have been allocated with the `ref:DMX_REQBUFS` ioctl.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 36); [backlink](#)

Unknown interpreted text role "ref".

Applications set the `index` field. Valid index numbers range from zero to the number of buffers allocated with [ref`DMX_REQBUFS`](#) (struct `c:type:`dvb_requestbuffers`` count) minus one.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 40); [backlink](#)

Unknown interpreted text role "ref".

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 40); [backlink](#)

Unknown interpreted text role "c:type".

After calling [ref`DMX_QUERYBUF`](#) with a pointer to this structure, drivers return an error code or fill the rest of the structure.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 44); [backlink](#)

Unknown interpreted text role "ref".

On success, the `offset` will contain the offset of the buffer from the start of the device memory, the `length` field its size, and the `bytesused` the number of bytes occupied by data in the buffer (payload).

Return Value

On success 0 is returned, the `offset` will contain the offset of the buffer from the start of the device memory, the `length` field its size, and the `bytesused` the number of bytes occupied by data in the buffer (payload).

On error it returns -1 and the `errno` variable is set appropriately. The generic error codes are described at the [ref`Generic Error Codes <gen-errors>`](#) chapter.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb]dmx-querybuf.rst, line 59); [backlink](#)

Unknown interpreted text role "ref".

EINVAL

The `index` is out of bounds.
