

# :sparkles: Atom UI :sparkles:

This is Atom's UI library. Originally forked from Bootstrap 3.3.6 , then merged with some core styles and now tweaked to Atom's needy needs.

## Components

Here a list of [all components](#). Open the [Styleguide](#) package ( `cmd-ctrl-shift-g` ) to see them in action and how to use them.

Styleguide

# Styleguide

Collapse AllExpand All

This exercises all UI components and acts as a styleguide.

## Badges

## Buttons

Buttons are similar to bootstrap buttons

### Standalone buttons

Button

Extra Small Button

Small Button

Large Button

```
<div class='block'>
  <button class='btn'>Button</button>
</div>
<div class='block'>
  <button class='btn btn-xs'>Extra Small Button</button>
</div>
<div class='block'>
  <button class='btn btn-sm'>Small Button</button>
</div>
<div class='block'>
  <button class='btn btn-lg'>Large Button</button>
</div>
```
