

V8 Torque syntax support for vim

This plugin adds syntax highlighting support for the V8 Torque domain-specific language.

Installation

Installation depends on your favorite plugin manager.

Pathogen:

Run

```
ln -s $V8/tools/torque/vim-torque ~/.vim/bundle/vim-torque
# or ~/.config/nvim/bundle/vim-torque for Neovim
```

Vundle:

Add this line to your `.vimrc` or `~/.config/nvim/init.vim`.

```
Plugin 'file:///path/to/v8/tools/torque/vim-torque'
```

vim-plug:

Add this line to your `.vimrc` or `~/.config/nvim/init.vim`.

```
Plug '~/path/to/v8/tools/torque/vim-torque'
```
