

## zh-CN

可以利用 `Card.Meta` 支持更灵活的内容。

## en-US

You can use `Card.Meta` to support more flexible content.

```
import { Card } from 'antd';

const { Meta } = Card;

export default () => (
  <Card
    hoverable
    style={{ width: 240 }}
    cover={}
  >
    <Meta title="Europe Street beat" description="www.instagram.com" />
  </Card>
);
```
