

Example app with analytics

This example shows how to use [Next.js](#) along with [Google Analytics](#). A custom `_app` is used to inject [tracking snippet](#) and track [pageviews](#) and [event](#).

Deploy your own

Deploy the example using [Vercel](#):

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-google-analytics with-google-analytics-app
# or
yarn create next-app --example with-google-analytics with-google-analytics-app
# or
pnpm create next-app -- --example with-google-analytics with-google-analytics-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
