

zh-CN

当需要在 `Button` 内嵌入 `Icon` 时，可以设置 `icon` 属性，或者直接在 `Button` 内使用 `Icon` 组件。

如果想控制 `Icon` 具体的位置，只能直接使用 `Icon` 组件，而非 `icon` 属性。

en-US

`Button` components can contain an `Icon`. This is done by setting the `icon` property or placing an `Icon` component within the `Button`.

If you want specific control over the positioning and placement of the `Icon`, then that should be done by placing the `Icon` component within the `Button` rather than using the `icon` property.

```
import { Button, Tooltip } from 'antd';
import { SearchOutlined } from '@ant-design/icons';

export default () => (
  <>
    <Tooltip title="search">
      <Button type="primary" shape="circle" icon={<SearchOutlined />} />
    </Tooltip>
    <Button type="primary" shape="circle">
      A
    </Button>
    <Button type="primary" icon={<SearchOutlined />}>
      Search
    </Button>
    <Tooltip title="search">
      <Button shape="circle" icon={<SearchOutlined />} />
    </Tooltip>
    <Button icon={<SearchOutlined />}>Search</Button>
  <br />
  <Tooltip title="search">
    <Button shape="circle" icon={<SearchOutlined />} />
  </Tooltip>
  <Button icon={<SearchOutlined />}>Search</Button>
  <Tooltip title="search">
    <Button type="dashed" shape="circle" icon={<SearchOutlined />} />
  </Tooltip>
  <Button type="dashed" icon={<SearchOutlined />}>
    Search
  </Button>
  <Button icon={<SearchOutlined />} href="https://www.google.com" />
  <br />
  <br />
  <Tooltip title="search">
    <Button type="primary" shape="circle" icon={<SearchOutlined />} size="large"
  />
  </Tooltip>
  <Button type="primary" shape="circle" size="large">
```

```

    A
  </Button>
  <Button type="primary" icon={<SearchOutlined />} size="large">
    Search
  </Button>
  <Tooltip title="search">
    <Button shape="circle" icon={<SearchOutlined />} size="large" />
  </Tooltip>
  <Button icon={<SearchOutlined />} size="large">
    Search
  </Button>
  <br />
  <Tooltip title="search">
    <Button shape="circle" icon={<SearchOutlined />} size="large" />
  </Tooltip>
  <Button icon={<SearchOutlined />} size="large">
    Search
  </Button>
  <Tooltip title="search">
    <Button type="dashed" shape="circle" icon={<SearchOutlined />} size="large" />
  </Tooltip>
  <Button type="dashed" icon={<SearchOutlined />} size="large">
    Search
  </Button>
  <Button icon={<SearchOutlined />} size="large" href="https://www.google.com" />
</>
);

```
