

zh-CN

位置有十二个方向。

en-US

There are 12 `placement` options available.

```
import { Popover, Button } from 'antd';

const text = <span>Title</span>;
const content = (
  <div>
    <p>Content</p>
    <p>Content</p>
  </div>
);

const buttonWidth = 70;

export default () => (
  <div className="demo">
    <div style={{ marginLeft: buttonWidth, whiteSpace: 'nowrap' }}>
      <Popover placement="topLeft" title={text} content={content} trigger="click">
        <Button>TL</Button>
      </Popover>
      <Popover placement="top" title={text} content={content} trigger="click">
        <Button>Top</Button>
      </Popover>
      <Popover placement="topRight" title={text} content={content} trigger="click">
        <Button>TR</Button>
      </Popover>
    </div>
    <div style={{ width: buttonWidth, float: 'left' }}>
      <Popover placement="leftTop" title={text} content={content} trigger="click">
        <Button>LT</Button>
      </Popover>
      <Popover placement="left" title={text} content={content} trigger="click">
        <Button>Left</Button>
      </Popover>
      <Popover placement="leftBottom" title={text} content={content}
trigger="click">
        <Button>LB</Button>
      </Popover>
    </div>
    <div style={{ width: buttonWidth, marginLeft: buttonWidth * 4 + 24 }}>
      <Popover placement="rightTop" title={text} content={content} trigger="click">
        <Button>RT</Button>
