

Invalid getServerSideProps Return Value

Why This Error Occurred

In one of the page's `getServerSideProps` the return value had the incorrect shape.

Possible Ways to Fix It

Make sure to return the following shape from `getServerSideProps` :

```
export async function getServerSideProps (ctx: GetServerSidePropsContext) {  
  return {  
    props: { [key: string]: any }  
  }  
}
```
