

zh-CN

使用 `status` 为 Input 添加状态, 可选 `error` 或者 `warning`。

en-US

Add status to Input with `status`, which could be `error` or `warning`.

```
import { Input, Space } from 'antd';
import ClockCircleOutlined from '@ant-design/icons/ClockCircleOutlined';

const ValidateInputs: React.FC = () => (
  <Space direction="vertical" style={{ width: '100%' }}>
    <Input status="error" placeholder="Error" />
    <Input status="warning" placeholder="Warning" />
    <Input status="error" prefix={<ClockCircleOutlined />} placeholder="Error with
prefix" />
    <Input status="warning" prefix={<ClockCircleOutlined />} placeholder="Warning
with prefix" />
  </Space>
);

export default () => <ValidateInputs />;
```
