## PuppeteerNode.executablePath() method

Signature:

```
executablePath(channel?: string): string;
```

### Parameters

Parameter	Type	Description
channel	string	

Returns:

string

A path where Puppeteer expects to find the bundled browser. The browser binary might not be there if the download was skipped with the PUPPETEER\_SKIP\_DOWNLOAD environment variable.

### Remarks

**\*\*NOTE\*\*** `puppeteer.executablePath()` is affected by the `PUPPETEER_EXECUTABLE_PATH` and `PUPPETEER_CHROMIUM_REVISION` environment variables.
