

# Functional Programming Modules

The modules described in this chapter provide functions and classes that support a functional programming style, and general operations on callables.

The following modules are documented in this chapter:

**System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library) functional.rst, line 11)**

Unknown directive type "toctree".

```
.. toctree::  
  
    itertools.rst  
    functools.rst  
    operator.rst
```
