

Who made this?

RealWorld would not be possible without the [open source community](#) continuously helping push the project forward. In addition, the former team was composed of:

[Anish Karandikar](#) - Core Maintainer

MathWorker, ex-Google, ex-Computational Fluid Dynamicist, forever lover of tech & humanities ❤️

[Cameron Chapman](#) - Core Maintainer

Cameron Chapman is a Software Engineer at FanThreeSixty. He's an open source enthusiast and is helping to teach a local web development boot camp at Kansas University.

[Eric Simons](#) - Founder/Maintainer

Eric is a Software Engineer, UI Designer, and author of many technical books & tutorials. He oversees the project direction, maintenance and organizes the planning and development efforts of the team.

[Albert Pai](#) - Founder/Maintainer

Albert is a Software Engineer, DevOps ninja, and author of many technical books & tutorials. He oversees the project direction, maintenance and organizes the planning and development efforts of the team.

[Thinkster](#) - Funding/Support

[Thinkster](#) creates high quality resources that help Javascript developers succeed. The RealWorld project wouldn't exist without their funding, so please consider investing in [a Pro subscription](#) to help support us!

[James Brewer](#) - Admin

James is a Software Engineer at Square and a contributor to the Django project. He created & maintained the RW Django codebase and continually provides guidance for the RealWorld project itself.

[Sandeesh S.](#) - Admin

Full stack developer, Laravel enthusiast, Digital marketing specialist and an avid gamer.
