

## Image

Besides the native features of `img`, support lazy load, custom placeholder and load failure, etc.

### Basic Usage

::demo Indicate how the image should be resized to fit its container by `fit`, same as native [object-fit](#).

```
<div class="demo-image">
  <div class="block" v-for="fit in fits" :key="fit">
    <span class="demonstration">{{ fit }}</span>
    <el-image
      style="width: 100px; height: 100px"
      :src="url"
      :fit="fit"></el-image>
    </div>
  </div>

<script>
  export default {
    data() {
      return {
        fits: ['fill', 'contain', 'cover', 'none', 'scale-down'],
        url:
'https://fuss10.elemecdn.com/e/5d/4a731a90594a4af544c0c25941171jpeg.jpeg'
      }
    }
  }
</script>
```

...

### Placeholder

::demo Custom placeholder content when image hasn't loaded yet by `slot = placeholder`

```
<div class="demo-image__placeholder">
  <div class="block">
    <span class="demonstration">Default</span>
    <el-image :src="src"></el-image>
  </div>
  <div class="block">
    <span class="demonstration">Custom</span>
    <el-image :src="src">
      <div slot="placeholder" class="image-slot">
        Loading<span class="dot">...</span>
      </div>
    </el-image>
  </div>
</div>

<script>
```

```

export default {
  data() {
    return {
      src: 'https://cube.elemecdn.com/6/94/4d3ea53c084bad6931a56d5158a48jpeg.jpeg'
    }
  }
}
</script>

```

...

## Load Failed

:::demo Custom failed content when error occurs to image load by `slot = error`

```

<div class="demo-image__error">
  <div class="block">
    <span class="demonstration">Default</span>
    <el-image></el-image>
  </div>
  <div class="block">
    <span class="demonstration">Custom</span>
    <el-image>
      <div slot="error" class="image-slot">
        <i class="el-icon-picture-outline"></i>
      </div>
    </el-image>
  </div>
</div>

```

...

## Lazy Load

:::demo Use lazy load by `lazy = true` . Image will load until scroll into view when set. You can indicate scroll container that adds scroll listener to by `scroll-container` . If undefined, will be the nearest parent container whose overflow property is auto or scroll.

```

<div class="demo-image__lazy">
  <el-image v-for="url in urls" :key="url" :src="url" lazy></el-image>
</div>

<script>
export default {
  data() {
    return {
      urls: [
        'https://fuss10.elemecdn.com/a/3f/3302e58f9a181d2509f3dc0fa68b0jpeg.jpeg',
        'https://fuss10.elemecdn.com/1/34/19aa98b1fcb2781c4fba33d850549jpeg.jpeg',
        'https://fuss10.elemecdn.com/0/6f/e35ff375812e6b0020b6b4e8f9583jpeg.jpeg',
        'https://fuss10.elemecdn.com/9/bb/e27858e973f5d7d3904835f46abbdjpeg.jpeg',

```

```

      'https://fuss10.elemecdn.com/d/e6/c4d93a3805b3ce3f323f7974e6f78jpeg.jpeg',
      'https://fuss10.elemecdn.com/3/28/bbf893f792f03a54408b3b7a7ebf0jpeg.jpeg',
      'https://fuss10.elemecdn.com/2/11/6535bcfb26e4c79b48dde44f4b6fjpeg.jpeg'
    ]
  }
}
}
</script>

```

⋮

## Image Preview

⋮demo allow big image preview by setting `previewSrcList` prop.

```

<div class="demo-image__preview">
  <el-image
    style="width: 100px; height: 100px"
    :src="url"
    :preview-src-list="srcList">
  </el-image>
</div>

<script>
  export default {
    data() {
      return {
        url:
'https://fuss10.elemecdn.com/e/5d/4a731a90594a4af544c0c25941171jpeg.jpeg',
        srcList: [
          'https://fuss10.elemecdn.com/8/27/f01c15bb73e1ef3793e64e6b7bbccjpeg.jpeg',
          'https://fuss10.elemecdn.com/1/8e/aeffeb4de74e2fde4bd74fc7b4486jpeg.jpeg'
        ]
      }
    }
  }
</script>

```

⋮

## Attributes

Attribute	Description	Type	Accepted values	Default
src	Image source, same as native	string	—	-
fit	Indicate how the image should be resized to fit its container, same as <a href="#">object-fit</a>	string	fill / contain / cover / none / scale-down	-

alt	Native alt	string	-	-
referrer-policy	Native referrerPolicy	string	-	-
lazy	Whether to use lazy load	boolean	—	false
scroll-container	The container to add scroll listener when using lazy load	string / HTMLElement	—	The nearest parent container whose overflow property is auto or scroll
preview-src-list	allow big image preview	Array	—	-
z-index	set image preview z-index	Number	—	2000

**Events**

Event Name	Description	Parameters
load	Same as native load	(e: Event)
error	Same as native error	(e: Error)

**Slots**

Slot Name	Description
placeholder	Triggers when image load
error	Triggers when image load failed
