

# Textarea Autosize

A textarea component for React which grows with content.

-  [1.5 kB gzipped](#)

The `TextareaAutosize` component automatically adjust the textarea height on keyboard and window resize events.

```
{{"component": "modules/components/ComponentLinkHeader.js", "design": false}}
```

## Empty

```
{{"demo": "EmptyTextarea.js"}}
```

## Minimum height

```
{{"demo": "MinHeightTextarea.js"}}
```

## Maximum height

```
{{"demo": "MaxHeightTextarea.js"}}
```

## Base

The [TextareaAutosize](#) component is defined in the `@mui/base` package. It is reexported from `@mui/material` for convenience. In your application you may import it from either package.

```
import TextareaAutosize from '@mui/base/TextareaAutosize';
```
