

## zh-CN

双色图标可以通过 `twoToneColor` 属性设置主题色。

## en-US

You can set `twoToneColor` prop to specific primary color for two-tone icons.

```
import { Space } from 'antd';
import { SmileTwoTone, HeartTwoTone, CheckCircleTwoTone } from '@ant-design/icons';

export default () => (
  <Space>
    <SmileTwoTone />
    <HeartTwoTone twoToneColor="#eb2f96" />
    <CheckCircleTwoTone twoToneColor="#52c41a" />
  </Space>
);
```
