

Page.\$\$() method

The method runs `document.querySelectorAll` within the page. If no elements match the selector, the return value resolves to `[]`.

Signature:

```
$$<T extends Element = Element>(selector: string): Promise<Array<ElementHandle<T>>>>;
```

Parameters

Parameter	Type	Description
selector	string	A <code>selector</code> to query page for

Returns:

Promise<Array<[ElementHandle](#)<T>>>>

Remarks

Shortcut for [Page.mainFrame\(\).\\$\\$\(selector\)](#).
