

Color

Element uses a specific set of palettes to specify colors to provide a consistent look and feel for the products you build.

Main Color

The main color of Element is bright and friendly blue.

```
<el-row :gutter="12"> <el-col :span="10" :xs="{span: 12}"> <div
class="demo-color-box" :style="{ background: primary }" > Brand Color
#409EFF
<div
  class="bg-color-sub"
  :style="{ background: tintColor(primary, 0.9) }"
>
<div
  class="bg-blue-sub-item"
  v-for="(item, key) in Array(8)"
  :key="key"
  :style="{ background: tintColor(primary, (key + 1) / 10) }"
  >
</div>
</div>
</div>
```

Secondary Color

Besides the main color, you need to use different scene colors in different scenarios (for example, dangerous color indicates dangerous operation)

```
<el-row :gutter="12"> <el-col :span="6" :xs="{span: 12}"> <div class="demo-
color-box" :style="{ background: success }" >Success
#67C23A
<div
  class="bg-color-sub"
  >
  <div
    class="bg-success-sub-item"
    v-for="(item, key) in Array(2)"
    :key="key"
    :style="{ background: tintColor(success, (key + 8) / 10) }"
    >
  </div>
</div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: warning }" >Warning
```

#E6A23C

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(warning, (key + 8) / 10) }"
    >
    </div>
  </div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: danger }" >Danger
```

#F56C6C

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(danger, (key + 8) / 10) }"
    >
    </div>
  </div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: info }" >Info
```

#909399

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(info, (key + 8) / 10) }"
    >
    </div>
  </div>
```

```

    </div>
  </div>
</div>

```

Neutral Color

Neutral colors are for text, background and border colors. You can use different neutral colors to represent the hierarchical structure.

```

<el-row :gutter="12"> <el-col :span="6" :xs="{span: 12}">

  <div class="demo-color-box demo-color-box-other"
    :style="{ background: textPrimary }">
    >Primary Text<div class="value">{{textPrimary}}</div></div>
    <div class="demo-color-box demo-color-box-other"
      :style="{ background: textRegular }">
      >
      Regular Text<div class="value">{{textRegular}}</div></div>
      <div class="demo-color-box demo-color-box-other"
        :style="{ background: textSecondary }">
        >Secondary Text<div class="value">{{textSecondary}}</div></div>
        <div class="demo-color-box demo-color-box-other"
          :style="{ background: textPlaceholder }">
          >Placeholder Text<div class="value">{{textPlaceholder}}</div></div>
    </div>

</el-col :span="6" :xs="{span: 12}">

  <div class="demo-color-box demo-color-box-other demo-color-box-lite"
    :style="{ background: borderBase }">
    >Base Border<div class="value">{{borderBase}}</div></div>
    <div class="demo-color-box demo-color-box-other demo-color-box-lite"
      :style="{ background: borderLight }">
      >Light Border<div class="value">{{borderLight}}</div></div>
      <div class="demo-color-box demo-color-box-other demo-color-box-lite"
        :style="{ background: borderLighter }">
        >Lighter Border<div class="value">{{borderLighter}}</div></div>
        <div class="demo-color-box demo-color-box-other demo-color-box-lite"
          :style="{ background: borderExtraLight }">
          >Extra Light Border<div class="value">{{borderExtraLight}}</div></div>
    </div>

</el-col :span="6" :xs="{span: 12}">

  <div
    class="demo-color-box demo-color-box-other"
    :style="{ background: black }">
    >Basic Black<div class="value">{{black}}</div></div>
  </div>

```

```
class="demo-color-box demo-color-box-other"
:style="{ background: white, color: '#303133', border: '1px solid #eee' }"
>Basic White<div class="value">{{white}}</div></div>
<div class="demo-color-box demo-color-box-other bg-transparent">Transparent<div class="va
</div>
</div>
```
