

Cookie Object

- `name` string - The name of the cookie.
- `value` string - The value of the cookie.
- `domain` string (optional) - The domain of the cookie; this will be normalized with a preceding dot so that it's also valid for subdomains.
- `hostOnly` boolean (optional) - Whether the cookie is a host-only cookie; this will only be `true` if no domain was passed.
- `path` string (optional) - The path of the cookie.
- `secure` boolean (optional) - Whether the cookie is marked as secure.
- `httpOnly` boolean (optional) - Whether the cookie is marked as HTTP only.
- `session` boolean (optional) - Whether the cookie is a session cookie or a persistent cookie with an expiration date.
- `expirationDate` Double (optional) - The expiration date of the cookie as the number of seconds since the UNIX epoch. Not provided for session cookies.
- `sameSite` string - The [Same Site](#) policy applied to this cookie. Can be `unspecified` , `no_restriction` , `lax` or `strict` .
