

AMP Validation

AMP pages are automatically validated with [amhtml-validator](#) during development. Errors and warnings will appear in the terminal where you started Next.js.

Pages are also validated during [Static HTML export](#) and any warnings / errors will be printed to the terminal. Any AMP errors will cause the export to exit with status code `1` because the export is not valid AMP.

Custom Validators

You can set up custom AMP validator in `next.config.js` as shown below:

```
module.exports = {  
  amp: {  
    validator: './custom_validator.js',  
  },  
}
```

Skip AMP Validation

To turn off AMP validation add the following code to `next.config.js`

```
experimental: {  
  amp: {  
    skipValidation: true  
  }  
}
```
