

Purpose

This repository contains functions to be consumed by various Kubernetes and out-of-tree CSI components like external provisioner to facilitate migration of code from Kubernetes In-tree plugin code to CSI plugin repositories.

Consumers of this repository can make use of functions like `TranslateToCSI` and `TranslateToInTree` functions to translate PV sources.

Community, discussion, contribution, and support

Learn how to engage with the Kubernetes community on the community page.

You can reach the maintainers of this repository at:
